Work

Cactus

2013-01-01 —

CTO   https://cactus.ws (https://cactus.ws)

Cactus is a small software agency that builds web apps,mobile apps and websites for a wide range of clients. My role as the CTO is to develop strategies, lead the team and leverage technologies to build great products.

Highlights

- Evaluate and identify appropriate technology platforms (including web application frameworks and the deployment stack) for delivering the company's services.
- Lead several projects in which we develop the full stack including REST API in nodejs, Web version (using AngularJS or React) and mobile versions (iOS, Android)

Cactus

2010-07-18 — 2013-01-01

Senior Developer   http://cactus.ws (http://cactus.ws)

Developing iOS/Android apps and Web apps from the scratch, from the client requirements, to the app store interacting with other members of the team such as designers and the client. Leading some projects involving other developers and designers to do so. I've done a wide range of apps, from games to localization apps involving maps, complex animations and REST APi's.

Highlights

- Build iOS localization related apps involving: Maps, Local storage (Core Data), REST API interaction and API Development
- Build iOS Games including: Level downloads, In-App purchases
- Submmited several apps to both stores: Apple Store and Play Store
