EXPERIENCE

Cactus

CTO   Dec 2012 - Present

Cactus is a small software agency that builds web apps,mobile apps and websites for a wide range of clients. My role as the CTO is to develop strategies and leverage technologies to build great products. I do lead the engineering team and colaborate in our sales flow.

- Evaluate and identify appropriate technology platforms (including web application frameworks and the deployment stack) for delivering the company's services.
- Lead the team to do better software by helping to build progressive learning culture.
- Establish a predictable model of envisioning, designing and developing products.

Cactus

Senior Developer   Jul 2010 - Dec 2012

Developing iOS/Android apps and Web apps from the scratch, from the client requirements, to the app store interacting with other members of the team such as designers and the client. Leading some projects involving other developers and designers to do so. I've done a wide range of apps, from games to localization apps involving maps, complex animations and REST APi's.

- iOS localization related apps involving maps, local storage (Core Data), REST API interaction and API Development
- iOS Games, including level downloads, In-App purchases
- App store submission process

Vortex
